### **DETAILED ACTION**

1. Applicant's Amendment filed 10/07/2005 has been reviewed and placed of record in the file.

#### ***Allowable Subject Matter***

2. Claims 2-6, 10, 22-27, and 12 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or render obvious a transistor device or a flash memory device for forming a part of an integrated circuit with all exclusive limitations as recited in claims 2 and 22, comprising a first conductive region and a second conductive region defining a channel region therebetween; a third conductive region disposed over the channel region and separated therefrom by at least one dielectric layer; the third conductive region having a non-linear structural characteristic derived from a non-linear structural characteristic of a photo resist feature used as an etch mask for the third conductive region; the non-linear structural characteristic of the photo resist feature contributing to mechanical stability to the photo resist feature; when the device being a transistor, the third conductive region being a gate electrode, when the device being a flash memory device, the third conductive region constituting a word line and the at least one dielectric layer further including a charge storage layer; and the gate electrode and the word line defining a channel length that has a substantially constant dimension.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
